LUNAWOOD THERMOWOOD PLASTIC COMPOSITE is made of Thermowood fibres and high quality CIRCO® polymers. Lunawood Thermowood composite is the most stable wood composite available in the market. It is non toxic and off cuts can be burnt or recycled. The resulting product is 200% Thermowood, as there is more Thermowood than in the solid wood of the same dimension. The other side of the product is grooved and the reverse side is brushed. Luna TWPC is manufactured in Iisalmi Finland.
